Experience

Senior Full Stack Developer

Deltek

Mar 2023 - Jun 2024

Remote

- Contributed to Vantagepoint, an ERP solution designed for professional service firms, using a proprietary Javascript MVC framework and Visual Basic.
- Established a standard documentation format, inspiring colleagues to improve their documentation practices and leading to increased clarity among developers.
- Fixed many client-reported bugs, resulting in far greater user satisfaction and a 33% reduction in client-reported issues.
- Participated in requirements analysis in order to meet stakeholder needs and expectations.

Lead Full Stack Developer

dtour.life

Apr 2017- Feb 2023

Providence, RI

- Implemented customer-facing divorce management platform that consolidated all financial data for lawyers and spouses using React, Redux, Elixir, and Phoenix.
- Took ownership of dtour as sole developer, overseeing all technical aspects and taking on project management and design responsibilities in addition to engineering.
- Increased user retention by 400% by reimplementing the onboarding experience from the ground up to use a friendly and conversational natural language form.
- Directly assisted customers and leveraged feedback to identify areas for improvement, resulting in targeted requirement analysis and feature design.

Full Stack Developer

Hewlett Packard Enterprise

Jun 2015 - Mar 2017

Andover, MA

- Developed admin-facing enterprise storage management interface for easy monitoring of rack storage using a proprietary Javascript MVC framework (and later, React & Redux) and Java.
- Converted proprietary JS framework to React which led to streamlined user operation and codebase maintenance.
- Modernized the codebase, resulting in a 55% reduction in task completion time for the engineering team.
- Utilized the organization's design language to construct new visually consistent interface pages.

Education

B.S. in Computer Science, University of Massachusetts Amherst

2010 - 2015

Skills

Technical React, Hooks, Javascript, CSS, Tailwind, Documentation

Interpersonal Communication, Empathy, Collaboration, Adaptability, Learning Agility

Projects

VGM Radio - Built a web-based radio for listening to video game soundtracks using vanilla Javascript, Liquidsoap, Icecast, and MPD. Try it here: lukeleheny.com/vgmradio Source here: github.com/lleheny0/vgm-radio
